

Beställningslök 2024

Prislista för beställningslök med försäljnings- och leveransvillkor

Blomsterlök blommar tidigt på våren och hjälper naturen med bin och fjärilar samt är en billig växt som ger vackert resultat i parken, trädgården, kyrkogården, bostadsområden, rondeller, längs med vägar och cykelbanor mm.

Hög inflation, höga räntor och pågående krig i Ukraina gör att det råder oro på marknaden. Holland bojkottar lökförsäljning till Ryssland men efterfrågan från andra delar av världen är stor. När valutan sjunker i värde blir lökar, som mycket annat, dyrare. Om fraktkostnaderna/bränslepriserna stiger efter en offert eller ordererkänd order kan vi behöva justera fraktkostnaden.

Hösten och vintern har varit mycket våt vilket lett till vattenskadorna på fält där blomsterlöken odlas. Våren har dessutom varit varm och torr så tillväxttiden blir kortare och därför kan vissa sorter ta slut snabbt. Vi uppmanar därför våra kunder att vara ute i god tid vid beställning av blomsterlök, så att vi får bra förutsättningar att kunna leverera rätt lök på rätt tid. Vid det fall vi inte kan få tag på sortäktade lök väljer vi en snarlik lök. Om det är viktigt med sortäktade lök måste detta anges vid beställningen.

Med vänlig hälsning,
